Professional Experience

Contract-Based & Freelance Frontend / Full Stack Developer - Jul 2025 - Present

- Built and deployed responsive websites and mobile applications for startups and small businesses on a **contract and freelance basis**.
- Developed a [BPO company website](#) with a full CMS and automated contact workflow..
- Created the **Patel Masala mobile application** with category-based product listing and order management functionality.
- Developed a **graphic design template-based mobile app** featuring a subscription system for recurring users.
- Delivered complete end-to-end solutions using **React.js, Node.js, Firebase**, along with deployment on **Vercel**, and provided support for **Google Play Store release**.

Full Stack Engineer Trainee - Nov 2024 - Jul 2025

[Qualzee Consultancy Pvt. Ltd. \(Qualwebs\) | Indore, India](#)

- Contributed to high-impact web projects including a Dubai-based law firm website, an internal work-log tracking system, and **GlobalTradePlaza.com** (major B2B marketplace).
- Built custom modules such as a **discussion board (Google Chat-style)** and a **dynamic calendar scheduling component** with API integrations.
- Improved SEO, product listing, and client-side performance for GlobalTradePlaza, increasing organic visibility and user engagement.
- Collaborated with cross-functional teams under Agile methodology to deliver pixel-perfect, scalable UI and backend features.

- Worked with **React.js, Electron.js, Next.js, Node.js, and Tailwind CSS**, contributing at Level-3 depth across product features and optimizations.

Software Development Intern React.js - Jul 2024 - Sep 2024

[Codes For Tommorrow Pvt. Ltd. | Indore, India](#)

- Developed and maintained gaming platforms including betting and casino-style games using **React.js** and **Redux**.
- Contributed to **Royal Mega**, a number-based game with third-party API integration for real-time results
- Designed responsive UI using Tailwind CSS and improved real-time dashboard interactions.
- Collaborated with backend teams to integrate APIs and display live data with optimized UI performance.

Software Engineering Trainee Java -Feb 2023-Jul 2023

[Ypsilon IT Solutions Pvt. Ltd. | Indore, India](#)

- Developed and optimized backend business logic and RESTful APIs using Java + MySQL for scalable enterprise applications.
- Enhanced client portals by improving UI/UX, leading to a **25% increase in user satisfaction**.
- Optimized SQL queries and applied indexing, reducing key process execution time by nearly **50%**.

Projects

[GlobalTradePlaza - B2B Marketplace Platform live](#)

Tech Stack : React.js (**Class Components, pre-ES6**), Next.js (**SSR**), Node.js, Tailwind CSS

- Implemented **Server-Side Rendering (SSR)** using Next.js to significantly improve SEO and initial load speed.
- Increased SEO visibility and user retention by **35%** through optimized content delivery and structured metadata.
- Improved page load speed by **28%** using code-splitting, caching strategies, and image optimization.
- Collaborated with backend teams to integrate REST APIs, maintaining **99% uptime** and smooth production deployments.

[Royal Mega- Gaming Platform live](#)

Tech Stack : React.js, Redux, Tailwind CSS, REST API

- Built responsive UI and managed global state for real-time betting and gaming functionality.
- Integrated third-party APIs to fetch and display live results on an interactive dashboard.
- Increased user engagement by **40%** and reduced UI lag by **25%** through frontend performance optimizations.
- Implemented complete game logic for number selection (1–90, 90–100) with automated result processing.

[Qampus - Communication & Work Tracking Platform](#)

Tech Stack : React.js, Node.js, Sequelize, PostgreSQL, Redux, Bootstrap, Electron.js

- Developed an internal communication + project tracking platform (upcoming SaaS product) for company-wide usage.
- Built a cross-platform desktop application (Windows & macOS) using Electron.js for **automated screenshot capture every 2 minutes** for productivity monitoring.
- Designed and implemented web modules for project discussions, file sharing, and real-time messaging (Google Chat-style).
- Added dynamic calendar features for leaves, meetings, and project schedules.
- Reduced overall app lag by **30%** using optimized state management and efficient component rendering.
- Contributed to UI/UX improvements and bug fixes, ensuring smooth cross-platform performance and responsive layouts.
