- **Frontend: React.js, Redux, HTML, CSS, Tailwind CSS, Bootstrap**
- **Backend :** Java, REST APIs
- **Database:** MySQL, Sequelize
- **Tools:** Git, GitHub, Postman, Vercel, Netlify
- **Core Strengths:** Responsive Design, SEO Optimization, Agile Execution, Problem-Solving, Client Communication

Additional Skills

- **Frontend Frameworks:** Next.js
- **Backend:** Node.js, Express.js
- **Database:** PostgreSQL, Firebase
- **Programming Languages:** C, C++, Java
- **Concepts / Frameworks:** Electron.js, TypeScript, GraphQL (Learning Basics)
- **Operating Systems:** Windows, Linux, macOS
- **Soft Skills:** Adaptability, Quick Learning, Team Collaboration, Strategic Thinking

Experience

Freelance Frontend / Full Stack Developer - Jul 2025 - Present

- Developed and deployed responsive web and mobile applications for small businesses and startups.
- Created a **BPO company website** with complete CMS and contact workflow.
- Built a Patel Masala mobile application (in partnership) with category-based product management and order flow.
- Designed and implemented a graphic design mobile app featuring a subscription-based template system for recurring users.
- Delivered projects using React.js, Node.js, and Firebase with end-to-end deployment on Vercel and Play Store integration support.

Full Stack Engineer Trainee - Nov 2024 - Jul 2025
Qualzee Consultancy Pvt. Ltd. (Qualwebs) | Indore, India

- Contributed to multiple high-impact web projects including a Dubai-based law firm website, an internal work-log tracking platform, and GlobalTradePlaza.com (a major B2B marketplace).
- Built custom modules such as user discussion boards (similar to Google Chat) and calendar scheduling components with dynamic API integration.
- Enhanced SEO optimization, product listing, and client-side functionalities for GlobalTradePlaza, improving organic visibility and user engagement.
- Collaborated with cross-functional teams under Agile methodology to deliver pixel-perfect, scalable frontend and backend features.
- Worked extensively on React.js, Next.js, Node.js, and Tailwind CSS, contributing at Level-3 depth across product features and maintenance.

Software Development Intern React.js - Jul 2024 - Sep 2024
Codes For Tommorow Pvt. Ltd. | Indore, India

- Developed and maintained gaming platforms, including betting and casual casino-style games using React.js and Redux.

- Contributed to the **Royal Mega** project — a number-based game where users select combinations (1–90 and 90–100), with logic and result display integrated via third-party APIs.
- Designed and implemented responsive UI with Tailwind CSS and improved real-time dashboard updates for better user experience.
- Collaborated with backend developers to connect APIs and display live game data with smooth UI performance.

Software Engineering Trainee Java - Feb 2023 - Jul 2023
Ypsilon IT Solutions Pvt. Ltd. | Indore, India
- **Developed and optimized backend business logic and RESTful APIs using Java and MySQL for scalable enterprise applications.**
- **Enhanced existing client portals by improving UI/UX components, resulting in a 25% increase in user satisfaction.**
- **Optimized SQL queries and implemented database indexing, reducing key process execution time by nearly 50%.**

Projects

GlobalTradePlaza - B2B Marketplace Platform live
Tech Stack : React.js **(Class Components, pre-ES6**), Next.js **(SSR)**, Node.js, Tailwind CSS
- Worked on **Server-Side Rendering (SSR)** using Next.js to improve SEO and initial page load performance.
- Improved **SEO visibility and user retention by 35%** through optimized content delivery and structured metadata implementation.
- Enhanced **page load speed by 28%** using code-splitting, caching, and image optimization.
- Collaborated with backend engineers to integrate REST APIs, ensuring **99% uptime** and smooth production deployment.

Royal Mega- Gaming Platform live
Tech Stack : React.js, Redux, Tailwind CSS, REST API
- Built **responsive UI and managed application state** for real-time betting and gaming functionality.
- Integrated **third-party APIs** to fetch and display live results on an interactive dashboard.
- Enhanced user engagement by **40%** and reduced UI lag by **25%** through performance optimization and efficient data flow.
- Implemented **game logic architecture** for number selection (1–90, 90–100) and automated result generation.

Qampus - Communication & Work Tracking Platform
Tech Stack : React.js, Node.js, Sequelize, PostgreSQL, Redux, Bootstrap, Electron.js
- Developed an **internal communication and project tracking platform** (upcoming SaaS product) for company-wide use.
- Built **desktop software (Windows & macOS)** using Electron.js to capture automated screenshots every 2 minutes and monitor productivity.
- Designed and implemented the **web interface** for project discussions, file sharing, and real-time messaging (similar to Google Chat).
- Added a **dynamic calendar system** for tracking leaves, meetings, and project delivery schedules.
- Optimized performance and reduced app lag by **30%** using Redux for state management and efficient component re-rendering.
- Collaborated on UI/UX improvements and bug fixes, ensuring smooth cross-platform functionality and responsive layout consistency.
